

# Json error test

The screenshot shows the JSONLint website with a JSON object entered in the text area: 

```
{
  "id": 0,
  "name": "Josue Marin",
  age: 21,
  average ":4.00}
```

 The line containing the trailing comma after "average" is highlighted in red. Below the text area are buttons for "Validate JSON", "Clear", and "Support JSONLint for \$2/Month". The "Results" section shows a red error message: "Error: Parse error on line 3: ...e": "Josue Marin", age: 21, average ": Expecting 'STRING', got 'undefined'".

```
1 {
2   "id": 0,
3   "name": "Josue Marin",
4   age: 21,
5   average ":4.00}
```

Validate JSON Clear Support JSONLint for \$2/Month

**Results**

Error: Parse error on line 3:  
.....e": "Josue Marin", age: 21, average ":  
.....^  
Expecting 'STRING', got 'undefined'

The screenshot shows the JSONLint website with the same JSON object as before, but now correctly formatted: 

```
{
  "id": 0,
  "name": "Josue Marin",
  "age": 21,
  "average": 4.00
}
```

 The "Validate JSON" button is active. The "Results" section shows a green message: "Valid JSON".
