

- POJO File
- Driver
- Manager DB
- Graphical Controls (Widgets) - Labels
  - Text Boxes
  - Buttons
- We have to design every window and forms.
- Integration of the components
- The system should be interfaced with the program.

### 3. PABLO ESTEBAN CARRERA QUINDE

Notes

- \* Class
- \* Class Operations (4 at least)
- \* Business Rules (4 at least)
- \* The inspector should review it.
- \* The user should test the program.
- \* Polymorphism should be in the program.
- \* Interface should appear in the program.
- @Override
- \* Programming Interface (and Data)
- \* The MVC (Model View Controller)
  - Controller: Manages interaction to the Database.
  - View: Everything that the user sees.
  - Model: Data files.
- Driver (Manager DB) - Connection between Driver and Manager.
- \* Every interaction should be implemented with 'Widgets'
  - Textboxes
  - Buttons
  - Labels
 Every form should have them.
- \* Mockups
  - Every window should show the structure.
- \* Navigation through the menu.
- \* Interaction
