

- Classes
- CRUD operations
- Business rules
- Unit Test
- Requirements V.S Program
- Polymorphism
- Abstraction
- Programming Interface

A Programming interface is the interface for others programmers who can use my program

- MVC patterns
- POJO Files
- Drivers
- Mongo DB
- Graphical Controls (Widgets) - Labels
 - Text Boxes
 - Buttons
- We have to design every window and forms
- Integration of the components
- The customer should be satisfied with the program
