

## Navigation

**Signposts:** Are features that help users figure out their immediate surroundings. Help users stay "found", include:

- Window title
- Logos
- Other branding devices

- Tabs
- Selection indicators

### "You are here" patterns

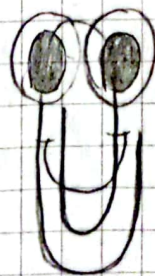

The following patterns represent common problems and solutions for helping users know where they are now.

- Sequence Map
- Breadcrumbs
- Annotated Scrollbar
- Color-Coded Sections

**Wayfinding:** Is what people (users) do as they find their way towards their goals, wayfinding and the structure of a system are directly dependent on each other.
