

Hw 09. Json

The screenshot shows the JSONLint website with an invalid JSON input. The input is a list containing an object with a trailing comma. The error message states: "Error: Parse error on line 3: ...Jhordy Marcillo", age: 19, average " Expecting 'STRING', got 'undefined'".

```
1 [{
2   "id": 0,
3   "name": "Jhordy Marcillo",
4   age: 19,
5   average ":4.00, "
6   isWorking ":true}
7 ]
```

Results

Error: Parse error on line 3:
...Jhordy Marcillo", age: 19, average "

Expecting 'STRING', got 'undefined'

The screenshot shows the JSONLint website with the same JSON input as the previous image, but now it is valid. The error message is gone, and the results section shows "valid JSON".

```
1 [{
2   "id": 0,
3   "name": "Jhordy Marcillo",
4   "age": 19,
5   "average": 4.00,
6   "isWorking": true
7 }]
```
